

How to Unzip Kwivira.zip

- 1) File Kwivira.zip is 616 MB in size
- 2) Download file and unzip it onto the C: Drive (see the screen shots below)

Right click the Kwivira.zip file and select Extract All

NOTE: The Destination drive is C:\ with NO additional Directory. The zip file will have the correct path in it. When the extract is finished you should have on drive C:\ a directory called Kwivira and under that is this structure:

3) Now move to C:\Kwivira (in a cmd window opened as administrator) and execute EADAN_Install_Start.bat
